UCLA Luskin Social Welfare

Public Affairs Building
337 Charles E. Young Drive East
Los Angeles, CA 90095-1656
Office: (310) 206-7564

February 6th, 2026

The Department of Social Welfare would like to nominate Yesi Camacho Torres for the 2025 – 2026 Distinguished Teaching Assistant Award. Yesi has served the Department and Luskin School in her role as a Teaching Assistant for Fall 2025's SOC WLF 202A course, Winter 2025's PUB AFF 145 course, and Fall 2024's PUB AFF 80 course. In addition to her work within the Department and Luskin School, Yesi has also served as a Teaching Assistant to the Departments of Health Policy and Management and Public Health over the past two academic years.

Yesi's course evaluations demonstrate her dedication to supporting students in their course work and personal growth. Yesi's students have lauded her approachability, availability, communication, and knowledge in the course content. One of her PUB AFF 80 students stated that Yesi "sparked my interest in this field of study because of her abilities to make the subject feel like it will truly make an impact in the world, especially since her job is working and helping children experiencing an unprivileged life and that really resonated with me. She is a great example of someone who took this field of study and made it a contribution to our society."

"Yesi Camacho Torres is the best TA I have ever had. Even though this discussion was at 8:00 am, she was always so full of enthusiasm and was passionate about everything she taught. She is also one of the most thorough people I know because the feedback she provides on reflections is extremely comprehensive and helped me tremendously with preparing for the midterm and the final. I remember she told me that she was spending 30 minutes giving feedback on each reflection, which speaks volumes about her dedication to her students, even though she is a student herself. Yesi is very quick at responding to emails and messages, and I always felt comfortable asking her questions or for feedback."

These course evaluation comments are just snippets of the student and academic that Yesi strives to be. The Department of Social Welfare fully supports Yesi's nomination for this prestigious award and hopes that her work is recognized by the committee.

Sincerely,

Judith Perrigo

Judith L. Perrigo, Ph.D., LCSW
Assistant Professor of Social Welfare at the Luskin School of Public Affairs
E: jperrigo@luskin.ucla.edu | C: 818.822.4406

Nominee Self-Statement

My teaching accomplishments reflect sustained contributions as a Teaching Assistant (TA) for undergraduate and master's students across Social Welfare, Chicana/o and Central American Studies, Public Affairs, and Public Health. During Winter 2026, I continue to support student learning through instruction, mentorship, and course facilitation in interdisciplinary classrooms, including a crosslisted course in Chicana/o Central American Studies and Public Health.

My role extends beyond grading or administrative tasks, including leading discussions, delivering guest lectures, facilitating applied learning activities, and providing individualized support for students with diverse academic backgrounds. Many students encounter these subjects for the first time, so material is presented in clear, accessible language, with concrete examples and structured discussions that encourage participation and critical engagement.

Supporting both undergraduate and master's courses requires flexibility in instructional approach. I assist students in developing foundational skills such as analytical reading, writing, and discussion, while helping advanced students apply concepts to professional and policy-relevant contexts. Office hours and one-on-one meetings provide opportunities for targeted feedback, mentorship, and confidence-building.

A defining feature of my TA experience is its interdisciplinary scope. Serving across four departments has strengthened adaptability to different course structures, learning objectives, and student populations. Faculty have entrusted me with substantial instructional responsibilities, reflecting confidence in my teaching effectiveness, professionalism, and classroom management.

In addition to my TA work, I was selected to teach an undergraduate course, *Health in Latino Populations*, during Summer 2025 under the mentorship of an experienced faculty member, Dr. Hayes-Bautista. While this role was distinct from my TA responsibilities, it reflects institutional recognition of my instructional skills and further informs the quality of my current teaching as a TA. The experience strengthened my ability to design learning activities, communicate complex material clearly, and support students with varied levels of prior knowledge.

Overall, my record demonstrates excellence in instruction, meaningful student engagement, and sustained contributions across departments and degree levels, reflecting both breadth and depth of impact and a strong commitment to student learning and success.

Statement of Teaching Philosophy

My teaching philosophy is grounded in the belief that all students deserve a safe, inclusive, and intellectually engaging space to learn, where they are supported as whole people and encouraged to think critically. I center my learners by designing instruction that is accessible, relational, and responsive, while maintaining clear expectations and academic rigor. I view teaching as a reciprocal process: students teach me as much as I teach them, and learning is strongest when it emerges through dialogue, reflection, and shared inquiry.

My approach is deeply informed by my own identities as a first-generation student, a DACA recipient, and an English language learner. These experiences shape how I show up in academic spaces and inform my commitment to authenticity in the classroom. I bring my full self into my teaching and encourage students to reflect on how their identities, backgrounds, and lived experiences shape how they engage with course material and with one another. I also guide students to recognize that their peers may hold different perspectives shaped by different experiences. This intentional attention to identity and positionality fosters critical thinking, empathy, and meaningful dialogue, which I view as essential conditions for genuine learning.

A central goal of my teaching is to meet students where they are while supporting their growth. I recognize that students enter the classroom with varying levels of preparation, confidence, and familiarity with the subject matter. To support this, I prioritize transparency, clear communication, and individualized support. I often meet with students outside of scheduled office hours to accommodate their learning needs and schedules, reinforcing my belief that access and flexibility are key components of effective teaching. My aim is not only to help students succeed in a single course, but to build their confidence as learners and thinkers.

I design learning experiences that emphasize active engagement and reflection rather than passive absorption of information. Class discussions, reflective writing, and collaborative activities are structured to encourage students to articulate ideas, ask questions, and learn from one another. Students frequently note that this approach allows them to engage with material more deeply and to see learning as a collective process. One student reflected that learning in my section emphasized “meaningful conversations with our peers” and highlighted that learning occurs “from student to student as well as from instructor to student” *(Artifact 1: Excerpted Student Evaluation Comments)*. This feedback reflects my belief that learning is most effective when students are active participants rather than passive recipients.

Assessment, in my teaching philosophy, is both diagnostic and developmental. I use tools such as a Pre-Course Knowledge Assessment *(Artifact 2)* to understand students’ prior knowledge, expectations, and areas of concern at the beginning of a course. This artifact illustrates my commitment to responsive teaching: I use the information gathered to adjust discussion topics, clarify expectations, and address gaps in understanding early on. By acknowledging students’

starting points, I am able to create a more equitable learning environment and tailor instruction to better support student growth.

This same commitment to responsiveness guided my decision to integrate institutional instructional supports into my teaching practice. When approximately half of my discussion section shared that they had never written a literature review or used an academic library database, I immediately coordinated with departmental librarians to schedule an instructional session for my students. This session provided targeted guidance on navigating library databases, locating peer-reviewed sources, and developing research strategies in preparation for their midterm paper *(Artifact 3: Library Instructional Support Session)*. By proactively leveraging campus resources, I sought to reduce structural barriers to academic research and ensure that all students—regardless of prior exposure—had the tools necessary to succeed. This artifact demonstrates my belief that effective teaching extends beyond the classroom and includes connecting students to institutional supports that promote academic confidence and skill development.

Feedback is another cornerstone of my teaching practice. I view feedback as an extension of teaching rather than an administrative task. I provide detailed, constructive comments that are designed to guide improvement and promote reflection. Students consistently note the depth and usefulness of my feedback, with one describing it as "extremely comprehensive" and instrumental to their success on major assignments *(Artifact 1)*. This reflects my belief that feedback should be clear, supportive, and actionable, helping students understand not only what needs improvement, but how to improve.

Equally important to my philosophy is cultivating an environment of care, approachability, and trust. Students frequently describe feeling comfortable asking questions, sharing ideas, and seeking support. One student noted that my classroom felt inclusive and that they never worried their questions would be seen as "stupid" or irrelevant *(Artifact 1)*. Creating this environment is intentional: I check in with students, encourage open communication, and model respect and curiosity. I believe that when students feel safe and supported, they are more willing to take intellectual risks, engage critically, and persist through challenges.

In sum, my teaching philosophy centers on inclusive, student-centered, and reflective learning, informed by my identities and experiences and enacted through intentional instructional practices. Through active engagement, responsive assessment, individualized feedback, and strategic use of institutional supports, I strive to create learning environments where students feel supported, challenged, and valued. The selected teaching artifacts—student evaluation excerpts, a pre-course knowledge assessment, and the integration of library instructional support—demonstrate how these beliefs translate into practice and support meaningful student learning.

Artifact 1: Excerpted Student Evaluation of Teaching (SET) Comments

The selected SET comments highlight key aspects of my teaching: thorough, constructive feedback; enthusiasm for course content; and an inclusive, supportive environment. Students note that feedback aids learning and builds confidence, while the classroom climate encourages questions and participation. The excerpts demonstrate how care, clarity, and inclusivity are enacted and experienced in practice.

Selected SET Evaluations: Public Health 106/ CCAS 106 (multiple quarters)

- Yesi is an amazing instructor, I always looked forward to hearing her comments, insights, and perspectives. I always appreciated her willingness to help and clarify any of our questions without making us feel judged. Probably one of my favorite instructors so far, like I would really enjoy to sit down one day and just have a full conversation with her! As for the course, I think it was well–structured. We didn't just sit there and listen to her talk for hours but we were encouraged to think critically, engage in meaningful conversations with our peers, and share our experiences and knowledge with the class as a whole. Sometimes I wish we could have volunteered to participate as sometimes I was eager to share but instead students were called on, which I understand. As a STEM major, I really appreciated this since it allowed me to learn outside of a textbook or lecture slide — that I don't really get to do in my other courses — since learning does not only occur from instructor to student but vice versa and also from student to student (whom I learned a lot from). I also enjoyed doing the weekly readings. I learned a lot through them even if though I was stressed out about reading them all before we started assigning them. Overall, this is one of my favorite courses. I learned a lot throughout these six weeks, not just about "mastering" the material to pass the course but about implementing my "mastery" of the material, gained knowledge, and sharing my lived experiences throughout my professional journey as a future health care provider to be able to advocate for my future patients within and outside the clinic
- The instructor is clearly passionate in the subject matter of this class and that is reflected in her teachings/ lectures. She did a great job at incorporating class discussions with assignments and lectures. Additionally, she always was engaging! No weaknesses to report.
- A strength of the instructor is being approachable. She cares deeply about her students' learning and emphasizes that she wants to help us as much as possible so that we can succeed. A strength of the course is the inclusion of one's narrative. An area of improvement for the instructor is time management during class, because there were times when we rushed over discussions due to time or when we went over the course's scheduled time. An area of improvement for the course is the amount of readings because it wa a lot for a short about of time.
- Yesi was an absolutely great TA! She is very knowledgable about course concepts and always found ways to foster discussion, ensuring that everyone participated with the content. She also went out of her way to check in on us throughout the quarter and had great communication with her students. Not only this, but her grading of our writing assignments leading up to our final paper was always very involved and helped guide and strengthen our writing.
- Yesi was an amazing TA and I throughly enjoyed being part of her section. She was very knowledgeable on the subject and helped breakdown the class material in the best way

possible. I really appreciated her sharing her own narrative to help us relate to the class—very inspirational.

- I really appreciate Yesi because of how helpful she has been throughout this course. She makes sure that we understand what we are learning and also helps us improve our writing such as APA style writing. She advocates for our learning and wants us all to succeed. I appreciated the time and effort she took in this course.

Selected SET Evaluations: Public Affairs 80

- Yesi Camacho Torres is the best TA I have ever had. Even though this discussion was at 8:00 am, she was always so full of enthusiasm and was passionate about everything she taught. She is also one of the most thorough people I know because the feedback she provides on reflections is extremely comprehensive and helped me tremendously with preparing for the midterm and the final. I remember she told me that she was spending 30 minutes giving feedback on each reflection, which speaks volumes about her dedication to her students, even though she is a student herself. Yesi is very quick at responding to emails and messages, and I always felt comfortable asking her questions or for feedback. I don't know if Yesi's goal is to become a professor after finishing her PhD, but I hope she goes down that route because any student would be lucky to have her.
- This teaching assistant was excellent! She clearly cared deeply about the students' well being. She frequently checked up on our emotions and ensured that she was providing the best support possible for students to succeed. She knew the course material very well and was able to consolidate the information into discussion.
- I think that this teaching assistant did a great job of keeping the class engaged even at such an early time of 8 am. She was so passionate about the topic in lecture so she would bring in outside knowledge to discussion from her personal experiences and research as a student which was pretty amazing. She sparked my interest in this field of study because of her abilities to make the subject feel like it will truly make an impact in the world, especially since her job is working and helping children experiencing an unprivileged life and that really resonated with me. She is a great example of someone who took this field of study and made it a contribution to our society. She was always open to conversation.

Selected SET Evaluation: Social Welfare 202A

- Yesi is the best TA I have ever had. She was always available through email and office hours and worked extremely hard to make the students in the class feel supported and encouraged whilst learning. I felt I could always go to her for a question and she has a unique ability to take complex concepts and break them down so they are easily understandable. Yesi expanded on ideas in class and provided relevant anecdotes to how the course material would relate to our licensing exams. I felt Yesi was approachable, knowledgeable, and understanding of student's abilities in the class. I would love to have Yesi as a professor one day as I believe she truly cares about her students and wants them to achieve new milestones academically. Her feedback was always thoughtful and well–explained which made it easy to apply to future assignments. I really appreciated having Yesi as a TA for this class.

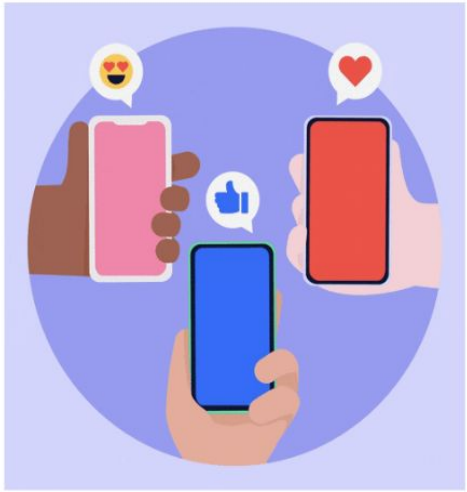

- Yesi was clearly extremely knowledgeable on social work and the DSM both. Her messages to the class offered clarity that was helpful to assignments. She gave constructive feedback on assignments that I found helpful and that I believe improve my overall writing skills. She had great communication skills and would send messages to the whole class when she thought it to be relevant.

Artifact 2: Pre-Course Knowledge Assessment

This artifact is a pre-course knowledge assessment designed to understand students' prior knowledge, backgrounds, and instructional starting points at the beginning of the course. Recognizing that students enter with varied levels of preparation, the assessment supports equitable and responsive teaching by identifying gaps, misconceptions, and areas where additional support may be needed (Ambrose et al., 2010; Cornell University, Center for Teaching Innovation, n.d.). Student responses informed adjustments to early course pacing, foundational content, and learning activities, ensuring appropriate entry points for learning while encouraging reflection and critical thinking. The assessment also signals that students' experiences and perspectives are valued, helping establish an inclusive and collaborative classroom climate from the outset.

What excites you the most about this course?

Learning

Learning something outside of my normal studies

I will be able to learn more about myself and my community from a different lens.

Learning a topic that I am interested in and want to know and understand more about.

learning more about my community

Learning about pre-colonial health in our indigenous communities

learning more about chicano studies

Learning something new

I would like to learn more about why

Understanding theories relevant to my future work and thinking critically about them

to learn more about health and what are health factors that need to considered

Learning about the health disparities in the Latino/Hispanic community and how to combat them as a future physician!

3 32

Join at menti.com | use code 9934 0343

Mentimeter

What excites you the most about this course?

about.

Learning more about my communities social issues and how we can best advocate for our health.

Being able to apply my lived experiences to the material we are engaging in. I believe in representation, and the strength in narrative story telling and social justice advocacy work in medicine

I would like to learn more about why there are so many health disparities affecting my community, Boyle Heights.

learning about history

My major is all about Latino health ! exited to learn more.

I am most excited to learn about the habits that can improve my health and which ones to avoid for a healthier

public health, latino health paradox

I'm excited to learn about how Latinos are directly affected by healthcare policy and disparities within it, as well as how we can improve it.

learning more about chicano studies

Gaining more insight on how health is

Mentimeter

What excites you the most about this course?

I love the idea of learning about my community, but also about the disparities that we face, and the things we can do to improve these conditions.

Learning about how healthcare differs among White and Hispanic people from a public health aspect

Learning different perspectives.

I am most excited to learn about the habits that can improve my health and which ones to avoid for a healthier lifestyle.

The topics seem interesting to me which is why I am taking this summer course

Learning more about Latino mental health and advocacy especially after taking Professor Steinbergs class in the spring on mental health in Latinx families

Gaining more insight on how health is impacted by Latin communities or any group in general.

Learning something new

Learning something new

I am most interested just to learn more about Latino populations when it comes to public health since growing up

3 32

Join at menti.com | use code 9934 0343

Mentimeter

What excites you the most about this course?

I am excited to learn how to connect qualitative and quantitative data together in a medical perspective, including resotriatvie justice on the latino population

Yes

Learning more about Latino populations as it relates to health care and how identity and health intersects

I am excited to learn more about health

I have been wanting to take this course for a while so I am excited that my schedule aligned. I am pursuing a career in mental health and I want to work with Latinxs, and I know this course will help!

I am excited to learn more about the Latino experience overall but especially in the healthcare field and also expanding my perspective.

Learning more about health and how Latinx play a role within the health field, especially drawing from my experiences

stories and learn about other's experiences!

I need a better context and knowledge base to improve my work as a public health practitioner. My senior research thesis (original, qualitative) was on food and nutrition in first-gen Mexican mothers.

It is topically outside of my public health education.

I believe this is a duplicate question

Artifact 3: Library Instructional Services Collaboration

This artifact demonstrates collaboration with the campus library to support students in research-based assignments. When I discovered that over half the class had never used a library database or conducted a literature review, I requested a library session (email confirmation) and scheduled (room and event confirmation). The session provided hands-on guidance in searching databases, evaluating sources, and conducting literature reviews, while also building students' confidence and awareness of campus resources, which are essential to their academic success.

Hi:

Thank you for requesting an instruction session! A library staff member will be in touch soon, usually within 3-5 working days.

In the meantime, here are a few resources to help connect you and your students to research help at UCLA Library:

Library Teaching Toolkit
Looking for an activity or assignment to help your students with the research process? The UCLA Library teaching toolkit provides a variety of handouts, interactive online modules, and other activities that you can include in your course.

Syllabus Blurb
Just copy and paste this text into your syllabus or research assignment to make it easy for your students to set up a personal research consultation or get research help online 24/7:

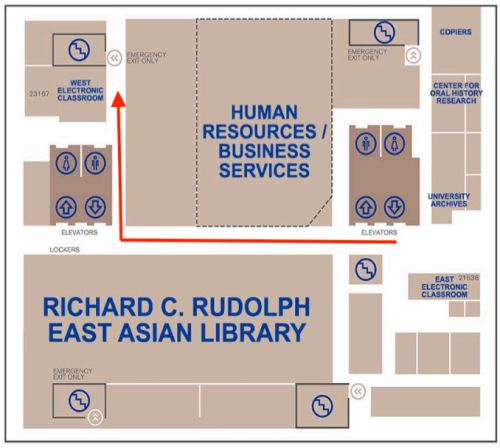

> **Research Help**
> Looking for help with your papers, assignments, and research projects? You can drop by one of our libraries, schedule a free research consultation, or get research help online 24/7. See https://www.library.ucla.edu/help/services-resources/ask-us for more information.
>
> **Research Guides**
> UCLA Library has created Research Guides for nearly every subject and many courses. Use them to help start your research! Visit https://guides.library.ucla.edu to get started!

All the best,
UCLA Library

Dear Yesi,
I wanted to confirm that we will be meeting in YRL tomorrow at 4:00 pm in the West Classroom. See directions below:

> The West Classroom is located on the second floor of the Charles E. Young Research Library. Upon entering the library, walk straight ahead toward the central elevators and staircase. Take the staircase or elevators up to the second floor. From the elevators, take a right down the long hallway past Library Human Resources and the Rudolph East Asian Library. Make a right at the first hallway you pass, walk past the bathrooms to your left, and past a small hallway. The West Classroom door will be on your left.

Second Floor

If you could ask students to bring their laptops to the sessions, that would be great. I'd like to have them follow along and do some searching on their own if there's time. SS

Distinguished Teaching Assistant — Letter of Recommendation

This award celebrates Teaching Assistants who demonstrate a pattern of effective teaching that incorporates current best practices (e.g., student-centered learning, active learning, inclusive teaching), aims to inspire and challenge students, and supports the success of all students.

Name Noah Chan

Briefly describe how you know the nominee. (50 words max)

In Fall 2024, Yesi Camacho Torres was my Teaching Assistant for PUB AFF 80 (How Social Environments Shape Human Development) at UCLA with Professor Latoya Small. I was a second-year undergraduate student in her discussion section at the time.

In a few sentences, describe a few ways in which the nominee inspired or challenged you or other students in the class. (200 words max)

As a Teaching Assistant, Yesi inspired my classmates and me to think radically, not just within the box. Once, I visited Yesi in office hours to inquire about a course reading which stated that children in homes with substance abuse often face significant obstacles in development but that children in foster care commonly experience damaging outcomes as well. Yesi stated that in some cases, the better option is to leave the children in their current homes. I told Yesi that I firmly believed she was incorrect. However, Yesi explained that in her experience in social work, many children adapt to the chaos of their households, and readjustment to an unfamiliar environment can be far more detrimental. That moment inspired me to develop a new way of thinking where I now ask myself, "Why could this be correct?" On another occasion, my classmates and I attempted to define the American Dream, asserting that one gains access to numerous opportunities by attending college. However, Yesi challenged our perspective, explaining that even as a TA at Harvard University, a number of her students were school administrators from underdeveloped nations, and due to technological barriers, these students often required additional time to complete assignments.

Describe one or two things that the nominee did that you thought were particularly beneficial for your (or other students') learning or understanding of concepts. (200 words max)

Midway through the quarter, I was struggling to understand Ecological Systems Theory, which posits that the interactions humans have with their surrounding environment molds their development, with the different categories of systems organized into rings. My question for Yesi was whether the inner rings had a more direct impact on an individual relative to the outer rings. Yesi responded that generally speaking, due to the level of face-to-face interactions, the inner rings have a more direct influence on development compared to the more distant outer rings. In addition to using the course material, she used her potential dissertation paper regarding immigration policy's influence on human development, with the macrosystem being the implementation of a new restrictive immigration policy, the exosystem being local employers' hesitancy to hire immigrants, the mesosystem being the parent losing job opportunities and income, and the microsystem being the immediate impacts on the child, such as increased parental stress, amplified family tensions, and the development of behavioral issues in the child. It was Yesi's consistent explanations of concepts utilizing real world applications, including those from her own work as a Social Welfare PhD student, that made these hard-to-grasp concepts far more digestible and applicable.

Please share any additional reasons why you believe the nominee is an outstanding candidate for this award. (100 words max)

In my nearly three years at UCLA, Yesi has undoubtedly been the most dedicated Teaching Assistant I have had. Our discussion section was on Thursdays at 8:00 AM, an unorthodox time for college students. However, Yesi began each section with snacks and a Mood Meter as a healthy outlet for emotional expression, something my classmates and I especially needed just two days after the 2024 Presidential Election. This was despite her position at Harvard requiring her to rise at 4:00 AM. Yesi is a knowledgeable, phenomenal person all around whose commitment to her students is simply unparalleled.

Distinguished Teaching Assistant — Letter of Recommendation

This award celebrates Teaching Assistants who demonstrate a pattern of effective teaching that incorporates current best practices (e.g., student-centered learning, active learning, inclusive teaching), aims to inspire and challenge students, and supports the success of all students.

Name

Nelly Zarrella

Briefly describe how you know the nominee. (50 words max)

Yesi Camacho Torres was my Teaching Assistant for SOCWLF 202A: Dynamics of Human Behavior, taught by Dr. Latoya Small in the 2025 Fall Quarter. I took this class in my first quarter of graduate school. I met with her throughout the quarter in office hours and class.

In a few sentences, describe a few ways in which the nominee inspired or challenged you or other students in the class. (200 words max)

Yesi provided a space in her office hours for myself and other students to be able to come in with questions, and helped us understand the class content by letting us explore freely without judging our initial thoughts and ideas. She let us think out-loud and helped guide our understanding by providing more information, support, and corrections. She ultimately had the goal of letting us find the answer ourselves with her support and suggestions rather than providing the answers to us directly.

Yesi supported my learning by pushing me to explore my understanding beyond what was expected in the classroom. I would come to Yesi with questions on assignments and I would be met with Yesi bringing course content to real-life scenarios, which was incredibly helpful for this specific class. Yesi encouraged me to think beyond what was expected of the class or assignment, and pushed me to think more deeply about the diagnoses and lenses, inspiring me to think critically about all course content I was engaging with.

Describe one or two things that the nominee did that you thought were particularly beneficial for your (or other students') learning or understanding of concepts. (200 words max)

Yesi worked hard to be able to make complex mental illness diagnoses more accessible to our understanding by going beyond what was in our textbook and on the slides, finding a way for us to understand these diagnoses by helping us see them within the context of the real world. Learning about mental illness diagnoses in a classroom without real life examples can be difficult, and Yesi supplemented this by using examples in office hours, helping us see how these diagnoses may show up in real life contexts. Yesi has the unique ability to always find a different way to explain course content to students if they are struggling with the concepts.

Yesi consistently provided space for her students to explore the challenges with the content and provided support in and out of the classroom. She stayed with students until they understood the content or had the answers to their questions. Yesi connected with students who were struggling, reaching out to provide additional support if necessary, making sure they felt confident and supported for the next assignment and in the class.

Please share any additional reasons why you believe the nominee is an outstanding candidate for this award. (100 words max)

Yesi was consistently accessible by email or office hours and came to class on her own time to make sure she was available in person for students. She was a relatable, personable, and an extremely well-informed TA who always put her students first and believed in them. Yesi instilled confidence in me as a practitioner and student in the social work field, and without her encouragement, I do not think I would have done as well as I did in my first quarter, in all my classes. I cannot think of a better candidate more deserving of this award.
